

# Control Panels, MCCs, HV Protection Panels and Custom Built Control Desks

**Idec's** manufacturing facilities are located at their main offices in Stockton-on-Tees. This facility is operated under strict ISO9000 quality guide lines.

Idec can provide a full and complete service from the manufacturing phase through factory acceptance testing to delivery, on site installation and commissioning.

All Idec panels are completed in strict accordance with regulatory and national standards and directives and we pride ourselves on the quality of our product and our ability to work closely with our clients to ensure that projects undertaken meet their full expectations.

Our expertise covers both panel and MCC construction, from simple control centres to the more complex PLC based systems, control desks and HV protection panels.

## **Services Offered Include:**

- Complete design and specification of equipment from metalwork to piping and wiring.
- Specification and procurement of instrumentation and associated hardware
- Design and specification of all types of mimic diagrams including rear engraved Perspex, melamine laminated, tiled and screen printed
- Painting and finishing to a wide variety of specifications.
- Assembly, piping, wiring, calibration and full functional testing.
- On-site installation and commissioning.

## Channel Tunnel Rail Link Panels Design and Build.
